ABSTRACTED-PUB-NO: JP 63253300A

BASIC-ABSTRACT:

Agent is obtd. by mixing 1 mol. of LiOH or KOH with 0.2-0.4 mol. of citric acid and 0.2-0.4 mol. of oxalic acid.

USE/ADVANTAGE - Used for radioactive decontamination work of equipment constituting an atomic power plant, etc. As non-volatile alkali such as lithium or potassium is used, it is possible to dispose decontamination wastes at a waste disposing facility of an atomic power plant and reduce the capacity of wastes. /2
